

WEEKLY SCHEDULE / SUMMER 2024

See ecdscampz.org for registration & early enrollment discount information

ODYSSEY CAMPZ 4TH, 5TH, 6TH & 7TH GRADES

Week-long Odyssey Campz summer adventures are designed to enrich the natural curiosity of students entering 4th through 7th grade in the fall.

Odyssey campers will enjoy themed weeks that utilize both on-site and off-site resources to blend non-stop, action-packed, hands-on learning experiences with loads of fun.

Matthew Decking
Director

Weekly Rate / Tuition Only: \$395
(\$375 when pre-paid by May 31st)

5-Week Bundle rate / Includes Unlimited Before & After Care: \$2,800
(\$2,600 when pre-paid by May 31st)

Odyssey Campz weeks wrap-up every Friday with water adventures either off-campus at a local beach, or on-campus using our own 19' and 27' high inflatable water slides.

WEEK 1 (July 8 to July 12)

● "Journey of the Padawans"

Campers will go "techno crazy" this week as they focus on the history of technology and the science behind Star Wars. They will engage in hands-on research and creative building projects. Students also learn to innovate and collaborate, as they customize our famous RC battle bots, which get put to the test in an epic tournament at the end of the week that pits the Empire against the Rebellion!

WEEK 2 (July 15 to July 19)

● "Oceanic Endeavors"

Calling all kids who LOVE the Ocean! During this wet'n wild week, campers will focus on the diversity and importance of Earth's oceans. Hands-on science experiments and exploration will inspire students to study the ocean from a variety of perspectives: Marine Biology, Marine Geology, Marine Chemistry, and Physical Oceanography. Excursions will include trips to local beaches and an array of water-themed venues. On-campus fun will include time on our 27' Hurricane water slide, and a surprise water play competition!

WEEK 3 (July 22 to July 26)

● "Feelin' Our Atmosphere"

Campers will explore what's beneath and beyond Earth's atmosphere as they learn about the history of flight and the forces that make it possible. Campers will learn about the vital gases that make up our atmosphere and universe. They'll be engaged in explorations of our solar system, the Milky Way Galaxy, and the expanded universe. They'll even design, build and launch rockets that can fly as high as 500' in the air! On-campus activities and competitions, and hopefully one or two off-campus excursions to flight and space-related venues, will round out a week that will take your high flier out of this world.

WEEK 4 (July 29 to August 2)

● "Globe-trotting"

Campers will have a blast this week integrating food and art! Campers will begin the week learning a bit about nutrition and healthy eating choices, and make their own culinary delights throughout the week. We will "travel" around the world exploring different tastes and cuisines and as we make stops on each continent, Campers will also engage in different styles of art and expression. To top it off, a surprise field trip or two promises to make this a very tasty, creative, and exciting week!

WEEK 5 (August 5 to August 9)

● "You Midas Well Win Gold"

Campers will feel the 'thrill of victory and the agony of defeat' as they are immersed in the grit and drama of the Summer Olympic Games. This is the week campers get to prove their mettle as they vie for medals in a series of challenging competitive endeavors known as the Odyssey Olympics. They'll also practice preparing an array of nutritious body-boosting foods and drinks, as they are inspired to condition their bodies inside and out. A sports-themed field trip will round-out this adrenaline-filled week.
